<b>*Comments</b>	Embroidery	• Polyester threads are stronger and more colorfast than rayon threads. We do not recommend rayon thread.																							
	Invisible Thread	• Neutral colors and fabric-matched colors of Bottom Line and Kimono Silk also tend to become invisible.																							
	Piecing	• MasterPiece cotton thread is recommended for piecing, especially when high-heat pressing is needed. • Polyester can also be used for piecing; however, be sure to use a low-med heat setting when pressing.																							
	Serger	• Polyarn is a 'woolly-like' thread for fleece and stretch fabrics.
